About BioLife Solutions, Inc.

BioLife Solutions has pioneered the next generation of preservation solutions designed to maintain the viability and health of cellular matter and tissues during freezing, transportation and storage. Based on the Company's proprietary bio-packaging technology and a patented understanding of the mechanism of cellular damage and death, these products enable the biotechnology and medical community to address a growing problem that exists today. The expanding practice of cell and gene therapy has created a need for products that ensure the biological viability of mammalian cell and tissue material during transportation and storage. The HypoThermosol® and CryoStor™ products that the Company is selling today are a significant step forward in meeting these needs.

This news release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995.
